As a dedicated developer, I am passionate about problem-solving and committed to excellence. I bring strong analytical skills and a proactive approach to staying current with industry advancements, readily adapting to any language or technology.

PROJECTS

Personal Blog Website – with React and MongoDB

Developed a dynamic personal blog using React for a responsive frontend and MongoDB for a scalable backend, enabling users to create, edit, and view posts with seamless data management and an engaging user interface.

Web Scrapping Tools – Using Playwright, Selenium, and BeautifulSoup

Created efficient web scraping tools with Playwright and Selenium for browser automation, and BeautifulSoup for HTML parsing, to extract and process data from websites accurately for various analytical purposes.

Real Estate Website – using Mern and Tailwind CSS

Built a real estate platform using the MERN stack (MongoDB, Express, React, Node.js) and Tailwind CSS for a modern, responsive design, allowing users to browse, list, and manage properties with an intuitive interface.

Smart Resume Screening Tool – Python and MongoDB

Developing an AI-powered resume screening tool using Python for data processing and MongoDB for storing candidate data, enabling automated filtering and ranking of resumes based on job requirements.
